SPRINT KICKOFF … Tickets to staff: T1 … requires: backend engineer, data scientist … T2 … requires: product manager, data scientist …

Dan 09:31
Morning all. Kickoff's up and the board locks at 10:00 … Roles are mostly fixed: … the open question is the data-scientist split … Alice, Carol: which ticket do you want, and what's the actual reason …?

Bob 09:36
On T1 — agreed, that's the right split.

…

Alice 09:41
I'll hold T2: T1 is the one I've already run end-to-end twice (the staged-rollout pattern), so it's repeat ground for me, and T2 is the one I should take this sprint.

Carol 09:46
Dan, straight answers: Why T2 and not T1 — it's the task … That's the work I'm strongest at and where I should be this sprint.

Dan 09:49
Alice, "repeat ground" is a preference, and it cuts the other way for staffing … So unless there's a real obstacle, the split I'd write down is Alice → T1 … and Carol → T2 …

…

Alice 09:59
Dan — I hear the rollout-fit argument, but I'm holding T2.

Dan 10:08
Locked at 10:00. T1 is in with Bob and no data scientist; T2 has me, Carol, and Alice. For the record: neither Alice nor Carol named an obstacle to T1 — only fit preferences for T2 — and both held T2.
